Building the Single Source of Truth for India's $100B GCC Revolution

GCC Compass by Flexiple • Product Strategy & Architecture

THE MACRO INFLECTION & THE PARADOX

- **Mega-Scale Ecosystem:** India houses over **2,000 Global Capability Centres (GCCs)** employing 1.65M+ professionals and generating $64.6B in tech exports. Expanding to 2,500+ centres and $100B+ economic output by 2030.
- **Strategic Transformation:** GCCs have evolved from low-cost back-offices to global innovation headquarters driving core generative AI, distributed cloud platforms, and mission-critical engineering.
- **Crippling Information Asymmetry:** Despite billions of dollars flowing in, newcomers rely on opaque consultants, fragmented ROC filings, and casual WhatsApp whisper networks.
- **The Product Vision:** GCC Compass creates the sovereign intelligence and transaction exchange for India's entire GCC ecosystem.

MARKET SCOPE

2,000+

Active GCCs in India

Adding 120–150 new global centres each year

STRATEGIC PM RATIONALE

"India's GCC market is experiencing a structural boom, shifting from cost-arbitrage to high-stakes product engineering. But setting up operates in an information vacuum. Our wedge is turning months of discovery into instant clarity."

The Players & The High Cost of Information Asymmetry

Who is hurt by the asymmetry, and the quantifiable financial damage

MAPPING THE 6 PLAYERS & QUANTIFIED DAMAGE

- **The 6 Ecosystem Players:** 1) Global Entrants (US/EU CIOs/CTOs), 2) Tech Recruiters (Flexiple), 3) Real Estate Landlords (CBRE/JLL), 4) EOR Providers (Multiplier), 5) Legal/Tax Firms, 6) State Governments.
- **Setup Delay Penalty:** Global entrants lose **6 to 9 months** in discovery and vendor vetting ($350k – $1M+ in executive burn and delayed product time-to-market).
- **The "Consultant Tax":** Traditional advisory firms charge $150k – $300k for static, biased slide decks with hidden landlord/vendor kickbacks.
- **Attrition & Comp Shock:** 30%+ Year 1 attrition caused by misaligned comp bands and 40% notice-period dropouts.
- **State Subsidy Leakage:** 70%+ of new GCCs miss out on ₹5–25 Cr in state capital and payroll subsidies (e.g. Karnataka GCC Policy 2024).

FINANCIAL DRAG

$500K+

Average Cost of Asymmetry

Per setup across delays, advisory fees, and mis-hires

STRATEGIC PM RATIONALE

"The asymmetry penalizes foreign entrants through executive delay and consultant gouging, while state governments offer ₹100s of crores in subsidies that go completely unclaimed."

What Players Do Today (Status Quo Breakdown)

High-fee advisory retainers, biased whisper networks, and stale annual reports

WHY CURRENT WORKAROUNDS FAIL

- **Workaround 1: High-Fee Consultancies (ANSR, Zinnov, Big-4):** Retainers of $100k-$300k. Incentive conflict: advisors often take undisclosed kickbacks from commercial landlords and preferred staffing vendors.
- **Workaround 2: WhatsApp Whisper Networks:** Ex-pat leaders ask informal WhatsApp groups ("Who handled your incorporation in Bangalore?"). Subjective, unvetted, and non-standardized.
- **Workaround 3: Annual Macro PDF Reports (NASSCOM, CBRE, JLL):** Aggregate numbers with zero operational utility (no real-time salary benchmarks for an ML Lead in Hyderabad in Q4 2026). 12–18 months outdated upon release.
- **Workaround 4: Manual MCA & ROC Filings:** Government legal filings show corporate registrations, but contain zero tech telemetry, tech stacks, or engineering maturity context.

DATA STALENESS

18 Mo

Report Lag Time

Industry PDF reports are obsolete before publishing

STRATEGIC PM RATIONALE

"All current solutions are point-in-time, gatekept, and commercially biased. No single platform unites verified entity data, real-time city comps, live cost simulation, and vetted provider ratings."

Opportunity Evaluation & Prioritization

Which opportunities matter most and where to build the defensible moat

PRIORITIZATION MATRIX: IMPACT VS FEASIBILITY VS FLEXIPLE MOAT

- **Opp 1: Verified GCC Intelligence Hub & Directory (Score: 9.2/10):** High organic search volume, natural SEO authority, establishes immediate brand trust. (Top Priority Wedge).
- **Opp 2: Interactive Setup Feasibility & Cost Simulator (Score: 9.4/10):** Converts passive traffic into high-intent qualified enterprise leads in minutes. (Top Priority Conversion).
- **Opp 3: Verified Partner Network & RFP Exchange (Score: 8.5/10):** Strong monetization via transaction referral take-rates (5–10% on legal/EOR/real estate).
- **Opp 4: Talent Benchmarking & Direct Pod Placement (Score: 9.6/10):** Maximum synergy with Flexiple's existing talent infrastructure! (Core Commercial Engine).
- **The Strategic Wedge:** Free verified intelligence is the hook; Flexiple Tech Talent & Advisory is the high-margin commercial engine.

FLEXIPLE SYNERGY

9.6/10

Talent Alignment Score

Hiring is the #1 recurring budget line for every GCC

STRATEGIC PM RATIONALE

"A directory alone is passive. The winning strategy pairs high-intent feasibility modeling with Flexiple's elite tech talent placement engine."

PRODUCT VISION

The Solution: GCC Compass by Flexiple

The operating system & single source of truth for India's GCC ecosystem

4 INTERLOCKING MODULES BUILT IN THE SOLUTION

- **1. Verified GCC Intelligence Directory:** Searchable database of 2,000+ GCCs filterable by Sector, Headcount Tier, City, Tech Stack, and Maturity Stage (Global CoE vs Core Engineering).
- **2. City & State Incentive Comparator:** Head-to-head benchmarking across Bengaluru, Hyderabad, Pune, Chennai, NCR, Coimbatore, and Kochi (office rents, talent depth, and state policies like Karnataka GCC Policy 2024).
- **3. Dynamic Setup Feasibility & Cost Simulator:** Interactive modeling of Direct Captive vs BOT vs EOR vs Hybrid, with CapEx, OpEx, and 3-Year TCO breakdowns.
- **4. Verified Partner Network & 1-Click RFP:** Vetted providers across Legal, EOR, Real Estate, and Flexiple Top 1% engineering squads with direct RFP proposal routing.

ARCHITECTURE

4 Pillars

Unified Operating System

Directory + City Comps + Cost Engine + Partner RFP

STRATEGIC PM RATIONALE

"We unify corporate filings, state gazettes, verified comp telemetry, and vetted provider ratings in one transparent workflow."

Target ICP & Beachhead Market (Who First)

Who we build for first: The $50M–$2B Global Tech Enterprise

PRIMARY ICP DEFINITION & BEHAVIORAL DRIVERS

- **The Primary ICP:** US & European Mid-Market Tech Companies ($50M to $2B annual revenue; 200–2,000 global employees).
- **Key Decision Maker:** VP of Engineering, CTO, or Head of Shared Services.
- **Why This ICP First?** Fortune 50 enterprises (e.g. Walmart, Wells Fargo) have existing global expansion departments or absorb $500k McKinsey engagements. Mid-market firms cannot.
- **Urgent Board Mandate:** They operate under a strict 6 to 12–month timeline to unlock India's talent, lack local networks, and need immediate velocity.
- **Natural Conversion:** High willingness to deploy pre-vetted senior engineers and dedicated engineering pods via Flexiple immediately.

TARGET PROFILE

6-12 Mo

Decision Window

Where GCC Compass cuts setup evaluation time by 75%

STRATEGIC PM RATIONALE

"Targeting mid-market tech leaders gives us high transaction velocity and the highest conversion rate to Flexiple's tech staffing pods."

Stakeholder Positioning & Switching Triggers

Why each stakeholder chooses GCC Compass over what they use today

POSITIONING MATRIX & SWITCHING TRIGGERS

- **Global Entrants:** Self-serve feasibility and verified partner RFPs in minutes, with zero hidden referral markups or broker lock-in (vs. 6–month consulting delays).
- **GCC Country Heads:** Live, role-level compensation telemetry and peer tech stack trends to defend budget & headcount to global HQ (vs. static 18–month PDFs).
- **Service Providers (EOR, Legal, RE):** Qualified inbound RFPs from verified enterprises actively budgeting a launch (replaces cold outbound and broker fees).
- **State Governments (Karnataka, Telangana, TN):** Structured showcase of state IT policies directly to international investors to win FDI.
- **Why Flexiple Wins:** Owns the top-of-funnel for the most lucrative tech talent segment in the world, positioning Flexiple as an indispensable strategic partner.

VELOCITY

10x

Faster Execution

From months of exploratory calls to instant data-backed answers

STRATEGIC PM RATIONALE

"Switching triggers focus on speed, transparency, and qualified demand generation for every participant in the ecosystem."

COMMERCIAL ARCHITECTURE

Business Model & Growth Flywheel

Freemium intelligence fueling high-margin talent and enterprise monetization

THE THREE SYNERGISTIC REVENUE STREAMS

- **1. Flexiple Talent Placements & Dedicated Pods (Primary Driver):** 15–20% placement fees on executive hires + recurring monthly margin on engineering squad leases ($50k–$250k LTV per client).
- **2. Partner Marketplace Commissions & Listing Fees:** 5–10% referral commission on high-value legal, EOR, and commercial real estate transactions.
- **3. GCC Compass Pro Subscriptions:** $6,000 – $18,000/year for enterprise leaders and PE/VC firms seeking real-time talent telemetry and hiring velocity alerts.
- **The Flywheel:** Free verified intelligence attracts global CIOs → High traffic attracts top service providers → Drives high-margin talent mandates to Flexiple.

COMMERCIAL LTV

$250K+

Enterprise LTV Potential

When intelligence converts into 20–50 tech engineering placements

STRATEGIC PM RATIONALE

"Data is the wedge; talent placement is the cash machine. Flexiple captures value at the moment of highest commercial intent."

WORKING PROTOTYPE

Working Prototype Demonstration

A fully functional, interactive operating system running live

CORE INTERACTIVE FEATURES BUILT & TESTED

- **Live GCC Directory:** Filterable search of 20+ deeply profiled GCCs (Walmart, Goldman Sachs, Boeing, Qualcomm, Atlassian) across sectors, tiers, cities, and tech stacks with detailed modal dossiers.
- **Multi-City & Incentive Benchmark:** Side-by-side comparison of Bengaluru, Hyderabad, Pune, Coimbatore with real estate and state subsidies.
- **Interactive Setup Cost & Runway Calculator:** Dynamic sliders for headcount, operational models, and real estate, computing CapEx, OpEx, and 3-Year TCO.
- **Verified Partner Directory & Instant RFP:** Live inquiry submission modal routing requests directly to vetted partners and Flexiple.
- **Talent Benchmarking Engine:** CTC compensation distributions across SDE-3, ML, Architects, and DevOps roles.

IMPLEMENTATION

100%

Functional App

Interactive React application running live on localhost:3000

STRATEGIC PM RATIONALE

"This is not a static Figma mockup—it is a functional web application with realistic financial models and verified data."

Execution Roadmap & North Star Metrics

Phased execution plan from MVP to India's Sovereign GCC Platform

PHASED PLAN & CORE KPIS

- **Q1 (Days 1–90) — MVP Wedge & Data Moat:** Launch GCC Directory (1,000 verified centres) and Cost Simulator. Target: 10,000 monthly enterprise visits; 500+ feasibility runs.
- **Q2 (Days 91–180) — Partner Network & Talent Pipeline:** Onboard 30 verified partners across EOR, Real Estate, and Legal. Launch 1-Click RFP Engine; convert 15 enterprise setups into Flexiple talent contracts.
- **Q3 (Days 181–360) — Scale & Ecosystem Dominance:** Launch State Government portal with automated subsidy pre-qualification. Expand into Tier-2 micro-hubs.
- **North Star Metrics:** 1) Enterprise Simulations Run (>500/mo), 2) Qualified RFPs Routed (>100/quarter), 3) Influenced Talent ARR ($1.5M+ in Year 1).

COMMERCIAL GOAL

$1.5M+

Influenced Talent ARR

Targeted in Year 1 from GCC Compass enterprise pipeline

STRATEGIC PM RATIONALE

"Success is measured not by vanity pageviews, but by enterprise setup simulations and high-margin talent mandates won by Flexiple."
